Product Description

Finish Shown: *Matte Copper* in images 1 - 2, *Rio Grande* in images 4 - 7
Installation: Farmhouse

This sink features 7 embossed stars: three along the back, and two along each sidewall. All of our farmhouse sinks by SoLuna are hand-hammered in 14 gauge, lead-free copper by 3rd generation coppersmiths. Our 14 gauge copper is the thickest copper available on the market—you don't need to worry about a metallic drumming sound as water flows into your sink. Our sinks are TIG copper welded.

This sink **fits standard 33" wide kitchen cabinet**. Check with your cabinet maker to make sure your cabinet is built to standard proportions.

SoLuna's stunning farmhouse sinks can be installed in a variety of ways including a standard undermount installation or drop-in/top mounted. You can download our kitchen sink installation instruction guide, shown [HERE](#). To see other sink installation options, please check out our Copper Gallery, shown [HERE](#).

We are happy to create a custom order for you. If you're interested in adjusting the dimensions or making other modifications please feel free to call us Monday – Friday, 7 am – 4 pm PST at (360)321-2131.
Free Shipping with all orders over \$100.00 to the 48 contiguous states!

****Please allow approximately 1-2 weeks for production and 3-5 business days for delivery. We find that ordering well in advance to your installation time is best.***

TIG Copper Welded

Maintenance Tips SoLuna Finishes:

Wiping your SoLuna copper product down with a soft rag and spot checking with soap and water is generally all the cleaning your SoLuna copper product will ever need. We recommend *NOT* using anything abrasive for bathing or cleaning, including products like bleach, bristle brushes, and harsh soaps.

To keep your copper sink or bathtub in premium condition, we recommend routinely waxing your sink or tub with [Renaissance Wax](#) or [Howard Wax-It-All](#).

Please note: Some Copper Products offer the option for the application of a lacquer seal to protect the original patina. Wax is not necessary to maintain the finish of lacquered copper products. However, waxing does provide an extra layer of protection from dirt and grease for both lacquered and unlacquered copper products.

PRODUCT REVIEWS

Top Notch

I would give this sink a "best in class" review as we have owned a number of copper sinks over the years and this is hands down the best quality sink we have purchased.
